**ART UNIT 2173**

14 April 2005

Art Unit: 2173

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Sawyer on 14 April 2005.

3. The application has been amended as follows:

In the Claims:

1. A method for tracking a plurality of actions against at least one object by a computer system, the method comprising the steps of:

(a) providing an output view, wherein the output view includes a first output area and a second output area;

(b) listing each of the plurality of actions in an action list in one of the first and second output areas, wherein the listing step (b) further includes the steps of:

(b1) displaying an action description for each action in the action list;

(b2) displaying a running status of each action in the action list; and

(b3) displaying a name of an object against which each action in the action list is directed;

(c ) allowing a user to select one action from the action list; and

(d) displaying information associated with the selected action in the other of the first and second output areas.

Claim 3 has been canceled;

Art Unit: 2173

Claim 4, line 1—"3" has been replaced by "2";

Claim 5, line 1—"3" has been replaced by "2";

Claim 6, line 1—"3" has been replaced by "2";

Claim 8, line 1—"3" has been replaced by "2";

17. A computer readable medium containing programming instructions for tracking a plurality of actions against at least one object by a computer system, comprising the instructions for:

(a) providing an output view, wherein the output view includes a first output area and a second output area;

(b) listing each of the plurality of actions in an action list in one of the first and second output areas, wherein the listing instruction (b) further includes instructions for:

(b1) displaying an action description for each action in the action list;

(b2) displaying a running status of each action in the action list; and

(b3) displaying a name of an object against which each action in the action list is directed;

(c) allowing a user to select an action from the action list; and

(d) displaying information associated with the selected action in the other of the first and second output areas.

Claim 19 has been canceled;

Claim 20, line 1—"19" has been replaced by "18";

Claim 21, line 1—"19" has been replaced by "18";

Claim 22, line 1—"19" has been replaced by "18";

Art Unit: 2173

Claim 24, line 1—"19" has been replaced by "18";

33. A computer system for tracking a plurality of actions against at least one object comprising:

a display;

at least one processor coupled to the display for providing an output view on the display, wherein the output view includes a first output area and a second output area, and wherein an action list comprising each of the plurality of actions is displayed in one of the first and second output areas and the action list includes an action description, a running status of each action in the action list, and a name of an object against which each action in the action list is directed; and

an input device coupled to the processor for allowing a user to select an action from the action list;

wherein the processor causes information associated with the selected action to be displayed in the other of the first and second output areas of the output view.

Claim 35 has been canceled;

Claim 36, line 1—"35" has been replaced by "34";

Claim 37, line 1—"35" has been replaced by "34";

Claim 38, line 1—"35" has been replaced by "34";

Claim 40, line 1—"35" has been replaced by "34".

The above amendment has been made in the interest of better distinguishing the claimed invention from generalized systems that might show acted-upon objects in one part of a display and details about them on another.
